Experience

Visiting researcher, **ServiceNow AI Research**, Montreal, Canada Oct 2026 – Jan 2027
Working with the Core AI team on recursive self-improving agents for enterprise benchmarks, enabling open-source language models to iteratively improve through interaction and experience.

Scientist in Residence, **Mila / Linarite AI**, Montreal, Canada Sep 2025 – Apr 2026
Built SIC-Agents, a clinician-facing platform that lets doctors practice pediatric serious illness communication. Two main contributions: (1) the first expert-verified benchmark suite for SIC training, validated with educators and pediatric clinicians; and (2) a self-improving agentic framework that generates a clinician-editable skill document to guide simulator behavior and outperforms static expert prompting.

Researcher Intern, **Huawei Noah's Ark Lab**, Montreal, Canada Jul 2024 – Sep 2024
Researched LLM post-training, studying supervised fine-tuning and preference-based alignment to improve reasoning and instruction-following.
